Github: https://github.com/GiaHung

Education

- Đại học Gia Định:
10/2022 - 10/2025
- Điểm GPA: 3,13/4,0
- English: Ability to read technical documentation.

Technical Skill

Back end:
Node.js (Express), NestJS, Springboot

Database
MySQL, MongoDB, PostgreSQL, SQL Server, Redis

Architecture:
Microservices, RESTful APIs, Message Queue (RabbitMQ)

Others
Docker, Git, NGINX, Authentication, Authorization, CI/CD basics

Career Objective

- Enthusiastic **Fresher Backend Developer** with solid skills in **Node.js, SpringBoot, RESTful APIs, and databases**. Knowledgeable in **Microservices architecture, Docker, and basic DevOps practices**.
- Eager to contribute to real-world projects and grow expertise in building scalable backend systems.

Work Experience

FullStack Developer Intern 4/2025 - 7/2025
TEKNIK TECHNOLOGY COPPRATION

Participated in developing a **Contract Management System** using **Node.js (backend)** and **React.js (frontend)**. Designed and implemented RESTful APIs to handle contract creation, update, and tracking. Integrated backend services with React.js components to ensure smooth data flow. Analyze requirements, design database schema, and optimize queries. Gained practical experience in full-stack development and improved understanding of system architecture.

Personal Projects

E-commerce Website 9/2024 - 12/2024

Members 1

- Description:** Developed a full-featured e-commerce platform with CRUD functionality for product management. Implemented shopping cart and order management with online payment integration via ZaloPay. Added Google account quick login for a seamless user experience. Secured the system using JWT-based user authentication and authorization.
- Tools & Technologies:** Nodejs(Express)/Jwt/Reactjs/bootstrap/javascript.

Point Of Sale 1/2025 - 3/2025

Members 1

- Description:** Built a management system with product management. Implemented invoice management to track orders and payments. Developed revenue tracking features to monitor business performance. Included customer management for storing and managing client information.
- Tools & Technologies:** JavaSpringBoot,Reactjs, JWT, Bootstrap

Website Bookingcare clone 3/2024 - 6/2024

Members 1

- Description:** Developed a web application that allows patients to register, manage their profiles, and book medical appointments online. Implemented CRUD functionality for user management. Designed a booking system enabling users to schedule, modify, and cancel appointments.
- Tools & Technologies:** Nodejs(Express)/Jwt/Reactjs/bootstrap/javascript.

Strengths

- Good understanding of Microservices-based system design and communication. Familiar with service decomposition, data consistency, and API gateway pattern
